

Keep your workstation at arm's length

Trolley

TraffiCom Trolley is a mobile workstation designed for demanding industrial environments. It is typically equipped with a TraffiCom Mobile Computer, a label printer, a scanner, two batteries and a voltage meter mounted on a robust trolley. TraffiCom Trolley gives you the freedom of unlimited movement through portability and wireless connectivity.

TraffiComTM
Computing solutions for extreme environments

Trolley. The flexible mobile workstation.

Ready-to-use. All required components such as rugged TraffiCom computer, wireless scanner, label printer and batteries are mounted on the trolley.

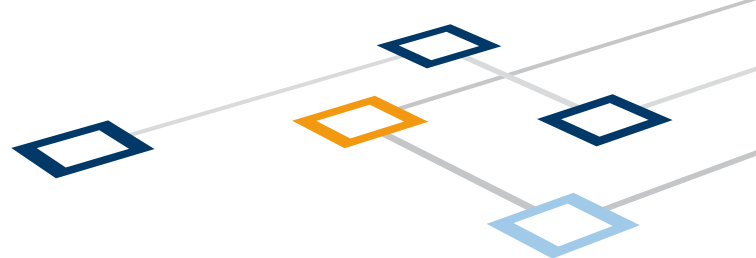

Continuous operation. The “hot-swap” function enables you to work without powering down the TraffiCom Mobile Computer. The Quick Power connector switches easily between the two batteries. You can continue to work with a fresh battery on your TraffiCom Trolley while the spare one is charged.

Customized. We can adapt the TraffiCom Trolley to your requirements by using components selected to match your specific needs.

Quality. Our TraffiCom Trolley is made of high-quality components and used in the toughest industrial environments all over the world.

Profitable. With TraffiCom Trolley at your side, you carry out work efficiently where it is needed – no more running to distant stationary computers and printers.
